Introduction

Driven by a passion to unlock impactful insights from data, I empower businesses to achieve their full potential. I believe data holds the key to smarter decision-making and growth, and I'm dedicated to translating it into actionable strategies. By combining my passion, proven experience, and commitment to continuous learning, I'm confident in making a valuable contribution to your team. I'm eager to discuss how my skills can help you achieve your data-driven goals.

Education

Bina Nusantara University

Jakarta, Indonesia

Bachelor of Information Systems

August 2020 - March 2024

- GPA: 3.75/4.00, Majoring in Enterprise Resource Planning (ERP)
- Relevant Coursework: Management & Organization, Integrated Business Process, Database Management and approaches, Testing and Implementation.

Work Experience

Baker and York Business Consulting (Remote)

Melbourne, Australia

Data Analyst

July 2024 - Present

- Specialized in domain work related to economic data, focusing on CPI Inflation, GDP, Interest Rates, GDP per Capita, and Unemployment Rates for individual countries and trading blocs.
- Monitored and visualized performance data for the **Better Australia** political advocacy campaign, supporting strategic messaging on stable governance through weekly optimization insights, which directly contributed to a successful **reach of 237,000 voters** in key electorates.
- Conducted data analysis and created visualizations for internal and client projects, utilizing tools such as SQL, Excel, Power BI, and Think-Cell to generate actionable insights and support strategic decisions.
- Performed detailed statistical analysis and data processing, including cleaning, transformation, and modeling, to uncover trends, correlations, and actionable insights that supported strategic business initiatives.
- Supported the Managing Director in developing data-driven content for social media

Samsung R&D Institute Indonesia

Jakarta, Indonesia

Intern Data Analytics

October 2023 - March 2024

- Streamlined data pipelines: Utilized Amazon S3, AWS Glue, and Athena for efficient ETL processing, ensuring smooth data availability for analysis.
- Worked with product management to understand the key metrics that needed to be tracked and visualized.
- Develop quantitative models and projections to track the performance of products on a periodic basis by creating Data visualizations and facilitating cross-functional team discussions to identify and resolve issues.
- Work on an international project focused on extracting actionable insights from Samsung applications, utilizing advanced analytics to analyze user behaviours, preferences, and engagement patterns, contributing to informed decision-making and enhancing the global user experience.

Samsung R&D Institute Indonesia

Jakarta, Indonesia

Intern System Operation Support

March 2023 - October 2023

- Effectively handles and presents confidential documentation for security audits and risk management activities.
- Possesses exceptional communication skills in both English and Indonesian, honed through extensive collaboration with international colleagues in operational settings.
- Demonstrates exceptional analytical and creative thinking skills in comprehending company infrastructure, network, security, and assets to pinpoint problems and devise practical solutions.

National Mandarin Competition 2022 (Volunteer)

Jakarta, Indonesia

Project Manager

April 2022 - October 2022

- Develop and execute a cross-Functional team via organization members, delivering the event and engagement towards Chinese culture enthusiast.
- We reach out 279 people to participate in our online competition due to pandemic and 50+ media partners through social media and networks to help us promoting our event.
- Successfully achieve our goals to announce all of the winners through YouTube video (Champion Announcement NMC 2022)

Projects
